Movement-games from Vilne around 1920 – an interactive lecture

In this interactive presentation, I would like to draw your attention to a book in Yiddish "bavegung-shpiln" (movement-games) from Vilna from 1920. How did children play at that time, outside and moving? Let's find out! If you are curious enough - you are invited to join in trying out this kind of physical culture together with us!
